IEEE ICDM 2026

WORKSHOP PROGRAM

IncrLearn 2026

10th International Workshop on Incremental and Continual Learning in the Age of Large-Scale AI

DATE
Thursday, November 12, 2026

TIME
13:00 – 15:30 (local time, UTC+8)

VENUE
Shenyang, China · Room Seoul

ABOUT

How do you teach a system that never stops learning, on data that never stops changing?

Data streams drift, user behaviour changes and knowledge goes out of date, while the large models now deployed everywhere are trained once and expected to stay relevant. Learning **continuously** — integrating new information without forgetting what is already known and without retraining from scratch — has become a central problem in AI.

Since 2013, **IncrLearn** has gathered the ICDM community working on this problem, from incremental clustering, concept drift and novelty detection to continual learning for large language models and foundation models.

The **10th edition** features:

- **Two invited talks**, by Eirini Ntoutsi and Elena Mocanu;
- **Two contributed papers**, on data-free merging of model updates and on parameter reuse for continual offline reinforcement learning;
- **An open discussion** on the future of the series and the associated journal special issue.

INVITED SPEAKERS

Prof. Dr. Eirini Ntoutsi
Research Institute CODE · AIML Lab
Universität der Bundeswehr München, Germany

Dr. Elena Mocanu
University of Twente, Netherlands

ORGANIZERS

Jean-Charles Lamirel
LORIA · Université de Strasbourg, France

Pascal Cuxac
INIST-CNRS, France

Manuel Roveri
Politecnico di Milano, Italy

Albert Bifet
IP Paris, France · University of Waikato, NZ

Barbara Hammer
Bielefeld University, Germany

Mykola Pechenizkiy
TU/e Eindhoven, Netherlands

SCHEDULE · THU, NOV 12

13:00 – 13:10 — **Welcome & Opening**

Jean-Charles Lamirel, on behalf of the organizers

13:10 – 13:55 — **Invited Talk I**

45 min, including Q&A

Title to be announced

Prof. Dr. Eirini Ntoutsi · Research Institute CODE, AIML Lab, Universität der Bundeswehr München

13:55 – 14:15 — **Paper Presentation** ON SITE

20 min, including Q&A

What Survives a Merge? Auditing Data-Free Composition of Domain and Task Updates

Elizaveta Sharushkina, Maria Khodorchenko

Paper S40202

14:15 – 14:35 — **Paper Presentation** ONLINE

20 min, including Q&A

TSN-Affinity: Similarity-Driven Parameter Reuse for Continual Offline Reinforcement Learning

Dominik Żurek, Kamil Faber, Marcin Pietroń, Paweł Gajewski, Roberto Corizzo

Paper S40203

14:35 – 15:20 — **Invited Talk II**

45 min, including Q&A

Title to be announced

Dr. Elena Mocanu · University of Twente

15:20 – 15:30

Open Discussion & Closing

Perspectives, special issue and next edition

All times are local Shenyang time (CST, UTC+8). The program may be subject to minor changes.

Hybrid session

One paper is presented remotely. Connection details for remote participants will be provided through the ICDM 2026 conference platform.

ACCEPTED PAPERS · IEEE XPLORE

What Survives a Merge? Auditing Data-Free Composition of Domain and Task Updates

Elizaveta Sharushkina, Maria Khodorchenko

TSN-Affinity: Similarity-Driven Parameter Reuse for Continual Offline Reinforcement Learning

Dominik Żurek, Kamil Faber, Marcin Pietroń, Paweł Gajewski, Roberto Corizzo
